Update Sets

Medium

Description

Objective: The objective of using Update Sets in ServiceNow is to capture, package, and migrate customizations or configurations.

- Identify the scope of changes (Business Rules, Client Scripts, UI Actions, Workflows, etc.).
- Define a naming convention and documentation standards for update sets.
- Create a new Update Set in the development environment.
- Collaborate with developers and administrators to ensure all relevant changes are captured.
- Validate that the Update Set aligns with deployment and ITSM governance processes.
